

Dentistry Seminar/Workshop Feb 13th, 2010

Webster Veterinary/Columbus Serum Company Invites You to join your colleagues for a day-long event dedicated to veterinary dentistry. This unique opportunity will offer hands-on and lecture opportunities to expand and master your dental skills. Topics include conscious dentistry, case study analysis, radiology interpretation and hands on usage of digital dental radiography . Aptitude and confidence with dentistry not only enhances patient care, but can be a cornerstone of your practice's revenue.

Dentistry Seminar/Workshop Feb 13th, 2010

This learning experience combines timely lecture topics, sedate dentistry demonstrations and interactive dental radiography.

During the workshop sessions, small groups will rotate between stations at intervals of 1 ½ hours providing an intimate learning experience.

Station 1: Sedate Dentistry: Dr. Bob Klosterman will be demonstrating the techniques used for “conscious dentistry”. This technique provides the general practitioner the ability to perform sedate preventive dentistry and X-Rays for Grade 1 Dentals.

Station 2: Case Studies and Radiography Interpretation: Dr. Dale Kressin will lead this interactive session in which case studies will be analyzed including interpretive radiology. This session will provide the tools and techniques to immediately incorporate into practice.

Station 3: Digital Dental Radiography: Webster Staff will work hands on with participants to utilize the latest in digital dental radiography equipment. This session will illustrate the value of incorporating dental radiography into the veterinary practice.

Register early to insure your spot as space is limited.
