Our Mission:
DIAGNOSE FIRST; TREAT OPTIMALLY

Working Together
We work with you, your veterinarian and other specialists to provide the best possible dental care for your pet. Compassion for you and your pet is fundamental to our mission.

Dental x-rays and periodontal probing are essential in obtaining a proper diagnosis. These procedures allow us to diagnose and treat our patients optimally. Treatment decisions are based on your needs and the needs of your pet.

We Address Pain

Pets should not have to suffer the pain and discomfort of untreated, cracked, broken, loose or infected teeth. Oral and dental problems are often extremely painful. Pets may not demonstrate pain and may even eat and play normally. Allow us to correct the issues and alleviate their pain.

Veterinary Dental Services

Endodontics: Root canals, treatment of fractured teeth, crown reductions and tooth infections.

Periodontics: Treatment of periodontal disease, tooth scaling and polishing, root planning, gingival surgery and guided tissue/bone regeneration.

Orthodontics: Bite evaluations, genetic counseling, and orthodontic treatments.

Restorations: Cast metal crowns, fillings, esthetic bonding, bridges and implants.

Dental Radiology: Diagnose periodontal and endodontic disease, missing or extra teeth/roots, oral tumors, fractures, and TMJ disease.

Oral Surgery: Dental extractions, jaw fractures, palatal defects, oronasal fistulas, oral tumors and dislocated teeth.

Oral Diseases: Oral manifestations of systemic disease, stomatitis, and oral autoimmune disorders.

Appointments & Procedures

Appointment/consultation times are provided on weekday mornings. Oral procedures are performed throughout the day. In most cases, your pet will stay with us for the day, and be able to return home with you later that day.

Estimates

Because of the variability of oral and dental problems set fees cannot be established. Fees are based upon the length of procedure, degree of difficulty and materials required. Due to these variables, over-the-phone estimates are difficult to provide. During your initial consultation, an oral examination will be performed and treatment options will be explained. A written estimate will be provided for all treatment plans during the consultation.

Payment Options

Our policy is to accept payment at the time services are rendered. We accept cash, checks, Visa, MasterCard and Discover. We also offer a payment plan through Care Credit. Please feel free to contact us or Care Credit at www.carecredit.com.

For detailed explanations of these services, please see our website:
